

What is claimed is:

1. A recording sheet comprising:

an ink-receiving layer capable of holding an ink; and

an ink-permeable layer provided on the surface of the
5 ink-receiving layer and permeating the ink therethrough to
transport the ink to the ink-receiving layer,

wherein the ink-permeable layer comprises a surfactant
having an HLB value of 9 or less.

10 2. The recording sheet according to claim 1, wherein the
ink-permeable layer further comprises a water-insoluble resin.

3. The recording sheet according to claim 2, wherein the
water-insoluble resin is a polyester.

15 4. The recording sheet according to claim 1, wherein
the ink-receiving layer further comprises a cation
group-containing compound.

20 5. The recording sheet according to claim 2, wherein
the ink-receiving layer further comprises a cation
group-containing compound.

25 6. The recording sheet according to claim 3, wherein
the ink-receiving layer further comprises a cation

group-containing compound.

5 7. The recording sheet according to claim 4, wherein the cation group-containing compound is a cation group-containing resin.

8. The recording sheet according to claim 5, wherein the cation group-containing compound is a cation group-containing resin.

10 9. The recording sheet according to claim 6, wherein the cation group-containing compound is a cation group-containing resin.

15 10. The recording sheet according to claim 4, wherein the ink-receiving layer further comprises a hydrophilic fixing aid comprising a resin different from the fixing agent.

20 11. The recording sheet according to claim 7, wherein the ink-receiving layer further comprises a hydrophilic fixing aid comprising a resin different from the fixing agent.
